

3-6 Year Olds enjoy a wide variety of activity in our Montessori classrooms. The materials are designed to capture your child's interest and encourage both concentration and independence. The activities in the classroom are designed to help develop your child's sense of order for logical thinking and problem solving, as well as to teach specific skills. Our mixed aged class is like a family. Three year olds benefit from the care and

modeling they receive from the older children, while the 4 & 5 years learn to become helpers and leaders. Every day includes new opportunities to learn. The Montessori materials have many levels of complexity so that your child can always be building and practicing new skills. Our Montessori teachers are dedicated to helping each child grow socially as well as academically. Morning and Afternoon snacks are set up in the classroom so that children can

independently prepare their snack and eat when they are hungry. Every day includes time to play outside, opportunities to “work”, relax, rest and play with friends.
